

Back to Table of Contents Hyperlink on Each Page

1. On the first page after the TOC, create a button (Tools > Interactive Objects > Add Button)
2. Click on "All properties" and configure the visible properties as desired (General, Appearance, Options).
3. Go to the Actions tab, and Select Trigger "Mouse Up," and select action "Go to a Page View."
4. Click "Add.."
5. Navigate to the TOC, and choose "Set Link." Then choose "Close."

Now, you have a button that hyperlinks to the TOC. The next step is to replicate that button.

1. With the select tool active, right click your button, and choose "Duplicate across pages..."
2. Indicate which pages you'd like the button to appear.
