*mission-focused, integrative STEM learning*

**EXSEED**

*for the future of Adventist K-12 science education*

Dear «SALUTATION»:

Five years ago we dreamed of a way to empower and reenergize the science and math educators in our schools. As you know, Excellence in STEM Experiential Education (EXSEED) grew from that dream.

This summer we hosted the 5th EXSEED Conference for teachers from across the country. Teachers from eight of our North American Unions participated in the workshop, as well as from The Mexico Union, the San Bernardino City Unified School District, and Jamaica. Our mission was to pack as much information and participation into five days as we possibly could fit in to the schedule. We had a “complaint” from one teacher, “I wish I could have more time so I could take more workshops.” Mission accomplished.

We continue to be humbled by your belief in our vision for the future of education. Thank you for encouraging us, and those who come to us for training, to EXSEED in all we do.

Sincerely,

Richard H. Hart, MD, DrPH  
President, Loma Linda University Health

Union/District	Number of Participants
Atlantic Union	1
Columbia Union	4
Mexico Union & Jamaica	6
Mid-America Union	1
North Pacific Union	28
Pacific Union	29
SDA Church in Canada	3
Southern Union	6
Southwestern Union	4
San Bernardino City Unified School District	12
Total	94

## EXSEED 2015 Statistics

Participants	Number attended
SDA K-12 teachers	78
SDA K-12 administrators	3
SDA conference representatives	6
Jamaica K-12 Public School Teachers	5
San Bernardino City Unified School District K-12 teachers	15
Additional K-12 teachers who attended only the two days of workshops	34

## Teacher Comments

A new way thinking. A new approach to teaching. With limited resources in our school I will have to be more innovative with my teaching. Use of a collaborative approach. Less teacher centered and more student centered approach

"Knowledge of iPads and apps, contacts with professors and other teachers, refreshing ideas to use in my classes"

If we are engaged, inspired and enthusiastic we will be able to ignite this passion in our students."

Using the iPad in the teaching learning environment is new to me, I am extremely excited about using the iMovie app with my students. I am appreciative of the experience to be exposed to a wide variety of websites and apps which will help to enhance the delivery of my lessons to my students."
